TECHNICAL SKILLS

Languages/Frameworks: Java, Javascript, HTML/CSS, React, React Native, Node.js, Python, C++

Databases: Supabase, MongoDB, Firebase, SQL, NoSQL, PostgreSQL

Tools: AWS (S3, Lambda, Athena, CloudFormation, EC2/ECS), Git/Github, Agile, RESTful API, Arduino, Postman

PROFESSIONAL EXPERIENCE

Advanced Environmental Monitoring | Cloud Engineer Intern

May 2025 – August 2025

- Built **real-time monitoring system** tracking **EC2/ECS** performance and vulnerabilities, enabling proactive issue resolution and reducing incident response time by **40%**.
- Conducted rightsizing analysis on **EBS** volumes via **PowerShell scripts**, identifying inefficiencies and cutting cloud storage costs by **\$30,000/year**.
- Automated cost analytics using **AWS Lambda**, **S3**, and **Athena** to enable real-time reporting and insights.
- Migrated **30+** legacy datasets from **EBS** to **S3** via **PowerShell** and **CLI**, cutting storage costs by **60%**.

Zebra Robotics | Coding Instructor

November 2024 – August 2025

- Mentored **30+** students in **OOP** principles and algorithms (Python/Java), conducting **weekly code reviews** to resolve logic errors and improve code quality.
- Refined **technical curriculum** modules, resulting in an **65%** quicker project completion rate and faster student progression.
- Led technical demonstrations for prospective clients, effectively communicating program value to drive a **35%** increase in enrollment.

PROJECTS

[ASL Express](#) | Hackathon Award Winner

October 2025

- Won best **hardware** project at **StormHacks 2025** by building an **AI-powered** platform that eliminates communication barriers for deaf customers at drive-thrus.
- Integrated **Gemini API** with **ElevenLabs** via a custom **Node.js** middleware to achieve low-latency (**<500ms**) bidirectional sign-to-speech translation.
- Engineered full-stack solution with **Arduino ESP32** hardware (ultrasonic sensors, buzzers, LCDs) guiding users through intuitive signing process.

[Study Spotr](#) | Full-Stack Software Developer

August 2024 - November 2025

- Built and deployed study spot discovery platform serving 100+ active students using **React**, **Node.js**, **MongoDB**, and **AWS S3**.
- Integrated **Mapbox API** with real-time **geolocation** to display **50+** verified study locations with **<350ms latency**.
- Designed scalable **backend architecture** supporting dynamic filtering, file uploads, and **concurrent queries** for growing user base.

PharmaBotics | Full-Stack Software Developer

July 2024 - August 2024

- Engineered full-stack medical dispensing system combining **React** frontend, **Node.js** backend, and **Arduino** hardware to automate medication distribution and reduce manual errors.
- Built real-time **Firebase** dashboard monitoring **5+** medication entries, cutting inventory discrepancies by **70%** and enabling instant staff alerts for low-stock.
- Designed **edge-case** handling for **15+** common user scenarios, improving system uptime to **99%** and preventing medication mix-ups in high-risk environments.

EDUCATION

Simon Fraser University | Burnaby, BC

September 2023 - December 2026

Bachelor of Science, Interactive Systems and Computer Science

Concentrations: AI/Data Science, Design and Development for Web and Mobile
